TECHNICAL SKILLS

Languages: Java, C/C++, Python, TypeScript, JavaScript, HTML/CSS, SQL

Frameworks: Ansible, React, Node.js, JUnit, Mocha, Chai

Developer Tools / Environments: Unix, Git, SVN, Firebase

PROFESSIONAL EXPERIENCE

Full Stack Developer Co-op

Sept 2022 – May 2023

CGI

Burnaby, BC

- Wrote Ansible playbooks independently and collaboratively with senior developers for configuration management, demoing to team leads and managers, and deployed scripts on Unix
- **Impact:** Improved maintenance of tech infrastructures and operational processes through automation
- Analyzed code base of a web application to investigate the workflow from the user interface to the database, using SQL queries to see how data was being stored, and documenting the process with sequence and ER diagrams
- **Impact:** Improved productivity of the team in understanding how the cache invoke process interacted with CronJob to kickstart an upgrade to an internal framework
- Reviewed and refactored code in Java, and wrote unit tests using JUnit and Mockito
- **Impact:** Improved quality of the user cache data by adding conditional paths to the invoke process

PROJECTS

Receipt Reader Android Mobile App

May 2024 – Present

Personal Project

Vancouver, BC

- Leveraging Kotlin and Java to build an app that reads and compiles receipts to streamline reimbursement processes
- Implementing camera and building data structure to store receipt as objects and Google Cloud Vision OCR API to detect text on receipt image and capture essential information
- Implementing features to take picture of receipt, review information on it, delete receipt, and email receipt
- Testing camera functionalities with Kotlin, JUnit, and Mockito to ensure correct behaviour against a mock UI

Music Sheet Domain Specific Language (DSL)

Jan – Feb 2024

Course Project

Vancouver, BC

- Built a DSL for generating sheet music, featuring creation, mutation, and repetition of notes, chords, and sequences
- Led the design of grammar rules by conducting user studies, iterating design of the language, implementing the feedback for each deliverable phase, and repeating this process to ensure an optimally intuitive language
- Leveraged ANTLR to implement grammar rules, JUnit for testing, and Java to convert tokens to AST objects

Chrome Extension for Seeking Refuge in Canada (2nd Place)

Mar 5 – 6 2022

cmd-f hackathon 2022

Vancouver, BC

- Awarded: Silver Prize (2nd place), 2nd Place TELUS: Leverage technology to support social sustainability and community building sponsorship
- Created a chrome extension that streamlines resources for refugees, including Google Maps for available services
- Used Firebase to set up the database, and used React to handle user queries for data retrieval

EDUCATION

University of British Columbia

Vancouver, BC

Bachelor of Computer Science (BCS)

Sept 2021 – May 2024

- Courses taken: Advanced Software Engineering, Introduction to Computer Networking, Natural Language Processing, Introduction to Relational Databases

Western University

London, ON

Master of Public Health (MPH)

Sept 2017 – Aug 2018

University of Toronto

Toronto, ON

Bachelor of Arts, Honours with Distinction – Health Studies Specialist, Sociology Major

Sept 2013 – May 2017
